Post-Task Survey

Open Ended Questions:

Participant ID

[   ]

Task ID: 1 (Creative Shape Design), 2 (Error Detection)

1	2

How did each type of feedback (Task Learning, Task Motivation, Self-level, No Feedback) provided by the intelligent agent affect you? Did it help or make it harder for you to do the task?

[   ]

How did the feedback from the robot agent compare to the feedback from the laptop agent?

Do you think the feedback from either the robot agent or laptop agent was more or less helpful than feedback you think you would have received from a human?

Do you have any additional insights or thoughts about the overall experience of interacting with the agents during the task?
